

When using the TI-83 Plus or TI-84 Plus calculators you access **Finance** by pressing the APPS key.

## Amortization Tables

Amortization is paying back a debt at regular time intervals with equal payments.

A table which indicates principal payments, interest payments, and the balance on a loan for each time interval is called the amortization table.

### Calculator Housekeeping Detail

When the **TVM Solver** is used, a number of financial variables are set and available for use in other financial calculations. The functions  $\Sigma\text{Int}(A,B)$ ,  $\Sigma\text{Prn}(C,D)$  and  $\text{bal}(X)$ , use the stored values PV, I%, and PMT from the **TVM Solver**.

$\Sigma\text{Int}(A,B)$  calculates the sum of the interest from period A through period B. For example,  $\Sigma\text{Int}(1,12)$  calculates the sum of the interest for the months 1 through 12.

$\Sigma\text{Int}(2,2)$  would be the interest for the second period.

Other functions which operate in a similar manner include  $\Sigma\text{Prn}(A,B)$  and  $\text{bal}(X)$ . The  $\Sigma\text{Prn}(C,D)$  computes the sum of the principal from period C through period D. The command  $\text{bal}(X)$  computes the balance for the amortization table for period X.

### Constructing an Amortization Table

*Example 1:*

*You purchase a house for \$100,000, pay 20% down, and mortgage the balance. You amortize your debt with monthly payments for 30 years. What is your monthly payment if your interest rate for the loan is 9% compounded monthly? Create an amortization table for this particular example.*

#### Method 1: Using TABLES

You can look at the amortization table by using  $Y_1$ ,  $Y_2$  and  $Y_3$  to store the principal, payments and balance and then use the TABLE functions on the calculator.

Use the **TVM Solver** to find the monthly payment and to set the financial variables.

1. Press  $\boxed{2\text{nd}} \boxed{[\text{FINANCE}]} \boxed{(5A)}^\dagger$  and choose **1:TVM Solver**.
2. Enter the values as shown. For PV, enter  $100000 \boxed{-} .2 \boxed{\times} 100000$ . This represents the amount of the loan, \$100,000, minus the 20% down payment. (Figures 1 and 2)

Note: the ellipsis in Figure 2 following the equal sign indicates that part of the expression entered for PV is not displayed on the screen. Use the cursor keys,  $\boxed{\rightarrow}$  and  $\boxed{\leftarrow}$ , to view the hidden parts of the expression.

$\dagger$  Refer to the section on Key Arrangement in Chapter 1 for an explanation of the key locator codes used in this manual.

3. Move the cursor to PMT and press  $\boxed{\text{ALPHA}} \boxed{\text{SOLVE}} \text{ (10E)}$ .

The monthly payment is \$643.70 (Figure 3)

(Figure 3)

```
N=360.00
I%=9.00
PV=80000.00
PMT=-643.70
FV=0.00
P/Y=12.00
C/Y=12.00
PMT: BEGIN
```

### Calculator Housekeeping Detail

Use of the **TVM Solver** has set variables that can be used by functions like **bal(X)**,  **$\Sigma\text{Int}(A,B)$**  and  **$\Sigma\text{Prn}(C,D)$** .

Use the **bal(** command to find the balance after payments 1, 2 and 3.

(Figure 4)

```
7:bal(
8:irr(
9:nPV(
6:tvm_FV
5:tvm_N
4:tvm_PV
3:tvm_I%
2:vars
```

4. Press  $\boxed{2\text{nd}} \boxed{\text{QUIT}} \text{ (2B)}$  to return to the Home Screen.

5. Press  $\boxed{2\text{nd}} \boxed{\text{FINANCE}} \text{ (5A)}$  and choose **9:bal(** to paste the **bal(** command on the Home Screen. (Figure 4)

6. Enter the payment number and press  $\boxed{\text{ENTER}}$  to find the balance after each payment. (Figure 5)

(Figure 5)

```
bal(1) 79956.30
bal(2) 79912.27
bal(3) 79867.91
```

### Creating the Tables

7. To create the tables, press the  $\boxed{\text{Y=}}$  key. (Figure 6)

(Figure 6)

```
Plot1 Plot2 Plot3
Y1=
Y2=
Y3=
Y4=
Y5=
Y6=
Y7=
```

8. Press  $\boxed{2\text{nd}} \boxed{\text{FINANCE}} \text{ (5A)}$  and choose **A: $\Sigma\text{Int}()$**  to paste the interest function in **Y<sub>1</sub>**. (Figure 7)

(Figure 7)

```
7:bal(
8:irr(
9:nPV(
6:tvm_FV
5:tvm_N
4:tvm_I%
3:tvm_PV
2:vars
A:ΣInt(
```

9. Enter  $\boxed{\text{X,T,θ,n}} \boxed{,} \boxed{\text{X,T,θ,n}} \boxed{\text{ENTER}}$  to complete the function. (Figure 8)

(Figure 8)

```
Plot1 Plot2 Plot3
Y1:ΣInt(X,X)
Y2=
Y3=
Y4=
Y5=
Y6=
Y7=
```

10. Store the principal balances in **Y<sub>2</sub>**. Move the cursor to **Y<sub>2</sub>**. Press  $\boxed{2\text{nd}} \boxed{\text{FINANCE}} \text{ (5A)}$  and choose **0: $\Sigma\text{Prn}()$**  from the CALC menu. Complete the command as in step 9 above. (Figures 9 and 10)

(Figure 9)

```
7:nPV(
8:irr(
9:bal(
0:ΣPrn(
A:ΣInt(
B:Nom(
C:Eff(
```

(Figure 10)

```
Plot1 Plot2 Plot3
Y1:ΣInt(X,X)
Y2:ΣPrn(X,X)
Y3=
Y4=
Y5=
Y6=
Y7=
```

11. Store the balance in  $Y_3$ . (Figures 11 and 12)

12. Before viewing the table, set the start value and the increment by pressing  $\boxed{2nd} \boxed{[TBLSET]}$  (1B). Set TblStart to 1 and  $\Delta Tbl$  to 1. (Figure 13)

13. Press  $\boxed{2nd} \boxed{[TABLE]}$  (1E) to view the table. (Figure 14)

(Figure 14)

X	Y <sub>1</sub>	Y <sub>2</sub>
1.00	-600.0	-43.70
2.00	-598.2	-44.02
3.00	-596.4	-44.36
4.00	-594.6	-44.69
5.00	-592.7	-45.02
6.00	-590.8	-45.36
7.00	-588.9	-45.70

Y<sub>1</sub> = -599.34

14. Press the  $\boxed{\blacktriangleright}$  key to see the values in  $Y_2$  and  $Y_3$ . Press the  $\boxed{\blacktriangleleft}$  key to see values for the different months in the payment schedule. (Figure 15)

(Figure 15)

X	Y <sub>2</sub>	Y <sub>3</sub>
1.00	-43.70	79956
2.00	-44.02	79932
3.00	-44.36	79908
4.00	-44.69	79883
5.00	-45.02	79858
6.00	-45.36	79833
7.00	-45.70	79807

Y<sub>3</sub> = 79867.91

*Example 2:*

*Find the payment needed each month for 1 year to pay off a debt of \$1,000 at 12% compounded monthly. Show the amortization schedule.*

Method 2: Using LISTS

1. Use the **TVM Solver** as in Method 1 to set the variables for later use in the lists.

The payment per month is \$88.85. (Figure 16)

2. To go to the home screen, press  $\boxed{2nd} \boxed{[QUIT]}$  (2B).

3. Press the  $\boxed{STAT}$  key (3C) and choose **5:SetUpEditor** from the EDIT menu. (Figure 17)

This will paste SetUpEditor on the Home Screen.

4. Enter  $\boxed{2nd} \boxed{[L_1]}$  (9B)  $\boxed{,}$  (6B)  $\boxed{2nd} \boxed{[L_2]}$  (9C)  $\boxed{,}$   $\boxed{2nd} \boxed{[L_3]}$  (9D)  $\boxed{,}$   $\boxed{2nd} \boxed{[L_4]}$  (8B)  $\boxed{,}$   $\boxed{2nd} \boxed{[L_5]}$  (8C)  $\boxed{ENTER}$  (10E).

The calculator will respond **Done**. (Figure 18)

5. Press the  $\boxed{\text{STAT}}$  key (3C) and choose **4:ClrList** from the EDIT menu. (Figure 19)

This will paste the **ClrList** command on the Home Screen.

6. Enter  $\boxed{2\text{nd}}$   $\boxed{[L_1]}$  (9B)  $\boxed{,}$  (6B)  $\boxed{2\text{nd}}$   $\boxed{[L_2]}$  (9C)  $\boxed{,}$   $\boxed{2\text{nd}}$   $\boxed{[L_3]}$  (9D)  $\boxed{,}$   $\boxed{2\text{nd}}$   $\boxed{[L_4]}$  (8B)  $\boxed{,}$   $\boxed{2\text{nd}}$   $\boxed{[L_5]}$  (8C)  $\boxed{\text{ENTER}}$  (10E).

The calculator will respond **Done**. (Figure 20)

7. Press the  $\boxed{\text{STAT}}$  key (3C) and choose **1:Edit** from the EDIT menu. (Figure 21)

8. When the lists appear, move the cursor to the top of the column so that  $L_1$  is highlighted and press  $\boxed{\text{ENTER}}$ . (Figure 22)

9. Enter **seq(A,A,1,12)** for  $L_1$ .

The **seq**( command is located in the OPS menu of the  $\boxed{2\text{nd}}$   $\boxed{[LIST]}$  key (3C). The syntax for this command is **seq**(expression,variable,begin,end). (Figures 23 and 24)

10. Highlight  $L_2$  and press  $\boxed{\text{ENTER}}$ .

Enter **seq(bal(B),B,1,12)** in  $L_2$ . (Figure 25)

The **bal**( command is located in the CALC menu of the  $\boxed{2\text{nd}}$   $\boxed{[FINANCE]}$  key (5A).

11. Highlight  $L_3$  and press  $\boxed{\text{ENTER}}$ .

Enter **seq( $\Sigma$ Int(D,D),D,1,12)** for  $L_3$ . (Figure 26)

12. Highlight  $L_4$  and press  $\boxed{\text{ENTER}}$ .

Enter **PMT -  $L_3$**  in  $L_4$ . (Figure 27)

The **PMT** variable can be found in the VARS menu of the  $\boxed{2\text{nd}}$   $\boxed{[FINANCE]}$  key (5A).

13.  $L_1$  through  $L_4$  constitute the amortization table for this example. Use the cursor keys,  $\rightarrow$  and  $\leftarrow$ , to explore the values. (Figure 28)

(Figure 28)

L2	L3	L4	4
1000.0	-10.00	-78.85
